To Whom It May Concern,

This letter is in reference to **TBRC Roofing Inc.** and an overview of the company as a whole. TBRC Roofing Inc. has been a preferred applicator of ERSystems elastomeric coatings for over 10 years. They have excelled in workmanship, professionalism, and delivering quality roof installations along the way. TBRC Roofing Inc. has proven time and again that the customer comes first, and delivering on the promises they make has made them one of the top applicators for ERSystems.

As a manufacturer, this is the type of company we would recommend as an installer on any roof restoration or full replacement project that we would come across. We have inspected many different systems that they have installed and they have always surpassed our expectations and standards for application.

Please feel free to contact me with any questions regarding TBRC Roofing Inc. and the quality of workmanship, reliability, and quality of their installations.

Best Regards,

Peter Kennedy  
Regional Manager  
ERSystems
